♦ PROFESSIONAL SUMMARY

Senior Backend Developer with 9+ years of experience designing and implementing scalable backend systems. Specialized in RESTful API design, microservices, and backend architecture using PHP, Laravel, and MySQL. Proven track record in integrating payment gateways, automating workflows with cron jobs, and securing high-traffic applications. Strong command-line and DevOps skills using Docker, AWS, and Linux CLI. Known for leading backend teams and enforcing clean code standards through PSR/SOLID principles.

♦ TECHNICAL SKILLS

- **Languages:** PHP, JavaScript, Python
 - **Frameworks:** Laravel, Nodejs, Express, Django
 - **API:** RESTful API, Google Business API
 - **Database:** MySQL, SQLite
 - **DevOps/Cloud:** AWS (EC2, RDS, S3), Docker, Linux CLI
 - **Other:** HTML, CSS, JQuery, Shell Scripting, Cron Jobs
-

◆ PROFESSIONAL EXPERIENCE

Senior Web Developer

AI Green | Apr 2024 – Present

- Integrated Web3 APIs into the purchasing module using RESTful design patterns for decentralized transactions
- Architected and developed the backend system for a Learning Management System (LMS) including authentication, role-based access, and API endpoints
- Integrated PayPal and Stripe gateways for multi-currency payments with PCI-compliant protocols
- Implemented real-time notification features using Pusher for live order and messaging updates
- Developed RESTful APIs and collaborated with frontend teams to optimize integration
- Used TDD methodology to ensure high reliability and reduced post-release bugs
- Performed security audits and deployment via Linux CLI on AWS servers
- Developed a fullstack referral-based commission system with JWT-secured APIs, role-based access control, and configurable multi-level commission logic using Node.js and React.
- Building a real-time chat system with Django and WebSockets, focusing on authentication, message persistence, and scalable backend design.

Senior Web Developer

MOC Interactive | Jan 2024 – Apr 2024

- Developed an enterprise store-management platform (MojoeStore) in Laravel, boosting operational efficiency by 30%
- Maintained and extended restaurant management system (MojoeResto) with online reservations and inventory features
- Built automated mail/notification modules in PHP to improve communication by 30%
- Created REST APIs for third-party ecommerce integrations

- Managed cloud deployments and updates using Linux CLI across DigitalOcean, GoDaddy, and AWS

Senior Web Developer

MYSOL | Sept 2022 – Dec 2023

- Developed a scalable Laravel backend for ecommerce and ERP systems used by 200+ clients
- Integrated postpaid payment services with local banks, processing 10,000+ monthly transactions
- Built SMS and email notification modules with Twilio/cron
- Wrote shell scripts for invoice generation and data issue tracking
- Co-led a team of 10 backend devs; conducted code reviews and enforced PSR/SOLID standards
- Developed cron jobs to automate bulk order workflows: validation, payment check, delivery routing, and success tracking
- Used Linux CLI for job scheduling, log tracking, and performance optimization

Mid-Level Web Developer

Blue Planet | Nov 2021 – Sept 2022

- Upgraded CRM system with RESTful integrations to KBZ and AYA banks for real-time payments
- Maintained Viber and SMS messaging portals; optimized API and increased delivery rates
- Handled 50,000+ daily SMS messages through gateway optimization on Nginx
- Developed CSV import modules for bulk uploads and campaign targeting
- Mitigated DDoS and SQL injection attacks; managed systems via Linux CLI

Application Support Lead

OKPar | Oct 2018 – Apr 2021

- Monitored system performance and resolved 95% of issues within SLA using custom dashboards
- Gathered feedback and test data to increase user satisfaction by 30%
- Led a 15-person team, automating key workflows to boost efficiency by 25%
- Aligned departmental KPIs with strategic business goals, raising operational efficiency by 10%

Junior Web Developer

Apex Group | Sept 2016 – Jul 2018

- Developed POS and terminal systems for petroleum companies using PHP/MySQL
- Created CMS and data systems that improved accuracy by 50%
- Built cron jobs for bulk order automation (payment checks, delivery planning, tracking)
- Managed web hosting, domain setup, and uptime via shared infrastructure

Junior Web Developer

GroovezAsia | Sept 2015 – Aug 2016

- Built a custom resume management platform to streamline hiring process
 - Managed structured data entry and content for media/public-facing sites
-

♦ EDUCATION

- **BSc (Hons) Business Information Technology** – University of Greenwich (2019)
 - **Level 5 Diploma in Computing** – NCC Education (2016)
 - **AGTI (Year 2)** – West Yangon Technology University (2009 – 2011)
 - **Math (Year 3)** – Dagon University of Distance Education (2013 – 2014)
-

♦ CERTIFICATIONS

- Advanced Web Development – Fairway Dev (2015)
 - Post-Intermediate English – Wall Street English (2019)
 - Java & PHP Programming – KMD (2013)
 - Microsoft Office – KMD (2013)
-

♦ VOLUNTEER & LEADERSHIP

- President, Student Council – KMD (2014)
- Secretary, Student Council – KMD (2014)
- Volunteer in donation organizations and community events
